PROFESSIONAL SUMMARY

Results-driven Functional Test Engineer with 8+ years of experience analysing business, functional, and technical requirements and translating acceptance criteria into detailed test scenarios, test cases, and test data across Mobile, Desktop, Web, and API platforms. Proven track record executing functional, system, integration, regression, and end-to-end testing within Agile/Scrum teams, with strong skills in exploratory testing, boundary and negative-case analysis, and requirement-gap identification. Experienced in defect lifecycle management, including investigation, clear reproducible reporting, retesting, and stakeholder risk communication using Jira. Skilled in maintaining requirement-to-test traceability, audit-ready test documentation, and release testing evidence, with domain exposure to regulated and compliance-sensitive environments including Digital Banking (KYC, payment processing, transaction security) and Healthcare (credential verification, compliance validation). Comfortable performing SQL/database validation and testing API and file-based integrations between systems. Actively applies AI-assisted engineering tools such as Claude Code and OpenAI ChatGPT/Codex to accelerate test scenario generation, test data preparation, coverage analysis, and defect investigation. Strong written and verbal communicator, confident raising questions on unclear requirements, and collaborates closely with Software Engineers, Business Analysts, and Product Owners throughout the SDLC/STLC.

PROFESSIONAL EXPERIENCE

SQA ENGINEER / FUNCTIONAL TEST ENGINEER

Cinnova Technologies L.L.C - Lahore, Pakistan

Jun 2021 - Present

- Analyse business, functional, and technical requirements for the YAP UAE digital banking platform (3+ years) to design test scenarios, test cases, and test data covering payment processing, KYC verification, and transaction security features.
- Author and maintain functional, integration, and regression test cases across Mobile, Desktop, and Web platforms, ensuring test coverage is traceable to requirements and acceptance criteria.
- Reduced production bugs by 40% by identifying boundary conditions, negative scenarios, and edge cases during requirement analysis and exploratory testing.
- Execute functional and regression testing on the UAT environment prior to every production release, achieving zero critical bugs in production.
- Identify, investigate, and document 500+ defects in Jira with clear reproduction steps, expected vs. actual results, and supporting evidence; perform defect retesting and regression validation following fixes.
- Perform end-to-end testing of API integrations and third-party data flows (150+ endpoints) covering authentication, payment processing, and data validation, including basic SQL-based data validation.
- Develop and maintain test plans, test cases, test reports, and traceability documentation across 10+ active projects to support release sign-off and quality audits.
- Participate in Agile ceremonies (sprint planning, daily standups, refinement, retrospectives) and collaborate with Development, Product, and DevOps teams to review requirements and raise gaps before development begins.
- Adopted AI-assisted engineering tools including Claude Code and ChatGPT to accelerate test scenario generation, test data preparation, and source code review, improving test design turnaround.
- Supplement functional testing with automated regression coverage (Selenium WebDriver, Playwright) and load testing (JMeter, 1000+ concurrent users) integrated into Azure DevOps CI/CD to support release confidence.

SOFTWARE QUALITY ASSURANCE ENGINEER

Zoom Digital - Lahore, Pakistan

Jun 2020 - Jun 2021

- Analysed requirements for real estate platforms (Piramal Realty, Zoom Property, 10,000+ daily active users) to design functional, regression, and UAT test coverage.
- Identified and documented 100+ defects through systematic functional and exploratory testing, improving application stability by 35%.

- Developed a Quality Planning strategy defining test scope, entry/exit criteria, and traceability across functional, regression, and UAT phases.
- Reduced average defect resolution time from 5 days to 2 days (60% improvement) by improving defect triage and reporting quality.
- Collaborated with a 15-member Product Development team across 5 concurrent projects, participating in Agile ceremonies and requirement reviews.
- Increased test coverage by 25% through continuous improvement of test case design and documentation practices.
- Prepared and presented weekly quality metrics reports to Senior Management; mentored 3 junior QA engineers on functional test case design.

SQA ENGINEER

Codility Solutions - Lahore, Pakistan

Jan 2018 - Jun 2020

- Designed and executed functional, integration, and regression test cases per sprint from requirements and acceptance criteria across multiple concurrent projects.
- Performed daily regression testing to identify critical defects prior to production deployment, achieving 99.5% production stability through rigorous UAT.
- Conducted integration and performance testing (JMeter, 500+ concurrent users) for an ERP system spanning HR, Accounts, Sales, and Purchase modules.
- Led defect triage meetings to prioritise issues by severity and business impact, and participated in sprint planning, standups, and retrospectives as part of an 8-person Agile team.
- Mentored 2 junior QA engineers on test case design and functional testing best practices.

SQA ENGINEER / SOFTWARE QUALITY ASSURANCE ENGINEER

SoftPyramid - Lahore, Pakistan

Sep 2016 - Oct 2017

- Tested an educational platform (MyBrowns) for international students, achieving a 95% test pass rate across 5 major releases with zero production incidents.
- Performed user acceptance testing with 20+ test users to validate usability and functional behaviour against requirements.
- Collaborated with development to investigate and resolve 80+ defects, and conducted security testing on authentication and data-access flows.
- Validated data privacy compliance against security and confidentiality standards; performed unit and component testing pre-deployment, catching 90% of defects pre-production.

TECHNICAL SKILLS

Functional & Manual Testing:

Functional, System, Integration, Regression, End-to-End, UAT, Smoke, Sanity, Exploratory, Boundary & Negative Testing

Methodologies & Processes:

Agile/Scrum, SDLC, STLC, Test-Driven Development (TDD), Behavior-Driven Development (BDD)

Test Management & Documentation:

Jira, Trello, Test Plans, Test Cases, Traceability Matrices, Test Reports, Defect Reporting, Release/Audit Evidence

Programming & Databases:

C#, Java (Basics), SQL, MSSQL, MySQL

API, Integration & Database Testing:

Postman, REST Assured, REST APIs, JSON/XML, SQL, File-Based Integrations

Frameworks & Tools:

JUnit, TestNG, Page Object Model (POM), Data-Driven Framework, Hybrid Framework

Automation & Performance Testing:

Selenium WebDriver, Playwright (C#), Cypress, JMeter, LoadRunner

CI/CD and Version Control:

Azure DevOps, Azure Pipelines, Git, GitHub

AI-Assisted Engineering and QA:

Claude Code, OpenAI Codex, ChatGPT — test scenario/case generation, test data preparation, coverage analysis, troubleshooting, source code review

Other:

Visual Studio, VS Code, Cross-Browser Testing, Test Documentation, Defect Tracking, Test Reporting

EDUCATION

Bachelor of Software Engineering

Government College University Faisalabad - Faisalabad, Pakistan

Graduated: 2016 | CGPA: 3.3/4.0

KEY PROJECTS

YAP UAE - Digital Banking Platform

Cinnova Technologies L.L.C | May 2021 - Dec 2024

<https://www.yap.com/>

Domain: Fintech (Regulated) | **Description:** UAE's leading digital banking mobile and desktop application offering instant account opening, spending analytics, bill payments, virtual card management, and money transfers. Owned functional test design and defect management for KYC verification, payment processing, and transaction security workflows, supported by API testing (150+ endpoints), performance testing (1000+ concurrent users), and CI/CD integration. Achieved 99.8% uptime through rigorous, traceable testing of critical financial workflows.

KonnexMe Virtual Advisor

Cinnova Technologies L.L.C | Oct 2021 - Present

<https://konnexme.com/applications/virtual-advisor>

Domain: Financial Services | **Description:** CRM system for financial professionals to manage client databases, appointments, communications, and reports. Conducted end-to-end functional and integration testing, including data integrity validation and workflow testing against third-party financial APIs.

NeuroNexus

Cinnova Technologies L.L.C | Oct 2021 - May 2022

<https://www.neuronexus.com/>

Domain: Healthcare Technology | **Description:** Neurotechnology platform for neural interface technologies, instrumentation, and analytics software supporting neuroscience research. Performed functional and integration testing of data collection systems, visualization tools, and API integrations, validating accuracy of scientific data processing in a data-sensitive environment.

Fullrein - Healthcare Staffing Platform

Cinnova Technologies L.L.C | Jul 2021 - Present

<https://fullrein.com/>

Domain: Healthcare | **Description:** Healthcare staffing platform connecting medical facilities with validated professionals. Tested complex, compliance-sensitive workflows including professional onboarding, credential verification, compliance validation, facility matching, and shift scheduling — requiring close attention to data accuracy and process traceability.

Property Obsession

Cinnova Technologies L.L.C | Jun 2021 - Apr 2022

Domain: Real Estate | **Description:** Real estate marketplace offering property listings, virtual tours, mortgage calculators, and agent management. Performed functional and integration testing across the online booking and property search workflows.

BrainWare Safari

Cinnova Technologies L.L.C | Jun 2021 - Feb 2022

<https://mybrainware.com/brainware-safari/>

Domain: EdTech | **Description:** Award-winning educational software with 20 exercises across 168 levels developing 43 cognitive skills. Tested gamification features, progress tracking, adaptive difficulty systems, and educational content delivery.

Piramal Realty

Zoom Digital | Jun 2020 - Present

<https://www.piramalrealty.com/>

Domain: Real Estate | **Description:** Real estate platform for online property booking, virtual site visits, and EMI calculators serving 10,000+ daily users. Designed and executed functional, regression, and UAT test coverage for booking and calculation workflows.

Zoom Property

Zoom Digital | Jun 2020 - Present

<https://www.zoomproperty.com/>

Domain: Real Estate | **Description:** Dubai-based property marketplace with agent management, property comparison, and document management. Tested integrated workflows across listing, comparison, and document-handling features.

Accounts ERP

Codility Solutions | Nov 2019 - May 2020

<http://www.accounterp.com>

Domain: Enterprise Software | **Description:** ERP system with integrated HR, Accounts, Sales & Marketing, Purchase, and Vendor Management modules. Conducted end-to-end integration and performance testing (500+ concurrent users) across interconnected modules.

Fileboard

Dec 2018 - Apr 2019

<https://fileboard.com/>

Domain: Sales & Marketing | **Description:** Sales engagement platform for meeting conversions and lead generation. Tested automated workflow and analytics functionality.

PhoneCheck

Upgenics International | Oct 2017 - Oct 2018

<http://www.phonecheck.com>

Domain: Mobile Diagnostics | **Description:** Multi-platform application (Android, iOS, Windows, Mac, Linux) for mobile device diagnostics. Tested IMEI verification, battery health assessment, ESN validation, and automated certification/label printing — data validation-heavy functional testing across device data.

MyBrowns English Learning School

SoftPyramid | my.browns.edu.au

Domain: EdTech | **Description:** Australian English learning school web application with quote generation, course selection, online assessment (MCQ and essay), fee calculation, admission processing, and document management. Performed functional and UAT testing across the enrolment and assessment workflows.
